HOTEL CLEARED \$2500 OR \$3000

Declares Proprietor Klinefelter after Spectators Wait Several Hours while Court and Attorneys Discuss Question.

The crowd was present but the entertainment lacking when Court opened for the morning period. At nine o'clock the room was nearly filled with spectators anxious to hear the sallies of the opposing attorneys. They waited, patiently at first, then signs of restlessness became apparent as time went on and neither judges nor attorneys appeared. Gradually they left, in twos and threes, until but a mere handful was left when the principals in the hearing appeared at 11:30 o'clock.

During the two hour and a half period between the time Court regularly convenes and the time Oliver Klinefelter was recalled to the witness chair (he was the last witness at Tuesday afternoon's session) the lawyers were endeavoring to "enlighten" the Court at a session in chambers. In other words, they argued the same old questions of the past three days in the judges' private room.

Half an hour before the noon recess the hearing was resumed in public and Klinefelter was asked to produce his account books, showing receipts of the past year. These were forthcoming and resulted in the information that the receipts of the bar and restaurant averaged \$90 a day during the winter months and about \$50 in the summer time. In this amount Mr. Klinefelter said he did not include the proceeds from regular boarders of whom he has from eight to twelve as a rule, nor did he include the revenue from the stable attached to the hotel.

He also said his profits ran from \$2500 to \$3000 a year. He did not keep any itemized account of expenses and was unable to differentiate between the several departments of the business. The hotel register was offered in evidence of the number of guests entertained as lodgers but it was not complete as Mr. Klinefelter said he sometimes neglected to have guests register.

This afternoon the interrogation of Klinefelter was resumed and he told a number of facts concerning the size of his bar, barroom, and the capacity of the house in general.

Late Tuesday afternoon Klinefelter was put on the stand for examination by the Court and testified to his conduct of the Hotel Washington, his interpretation of the liquor laws, and so on. This lasted about ten minutes and then counsel had another argument lasting an hour to determine whether or not Mr. Keith had the right to cross examine the applicant. He was finally granted this privilege, Mr. Hersh filing a number of objections.

Nothing special developed until Mr. Keith endeavored to find on what days Klinefelter was at deer camp. Mr. Hersh instructed him not to answer the question, declaring it was simply to get some dates in order to fix violations. Mr. Keith finally withdrew the question.

Witnesses for the remonstrants will be the next ones on the stand but the trend of the day's testimony does not indicate when the hearing will be concluded.

Immediately after the Hotel Washington case, the remonstrance against Hartzell's Cafe will be taken up. It is thought the decisions on these as well as of the York Springs cases will be announced at the same time.

TEACHERS' MEETING

Royd's School for Cumberland Township Session on Friday.

The fifth educational meeting of the teachers of Cumberland township will be held at Royd's School Friday evening at 7:30 o'clock. The public is invited.

THRESHERMEN TO DISCUSS NEW LAW

County Men who Operate Traction Engines Believe their Insurance Rate too High. To Meet in Court House.

A meeting of the Adams County Threshermen's and Farmers' Protective Association will be held in the Court House on the afternoon of Tuesday, February 8, at one o'clock. All employers of labor will find the meeting one of interest. President Brubaker of the State Association will be present to take up a discussion of the compensation insurance act, as it affects the threshermen.

It is claimed that other occupations more hazardous than threshing get their insurance for less than half the rate the threshermen must pay, and an effort is to be made for a revision. It will be recalled that several years ago, when the local organization of the State Association, which the Adams County Local is a part, this law was repealed and there was enacted in its stead, a measure which the threshermen regard as the best engine law in the country.

It is believed that the proposed effort for more equitable insurance rates can be equally successful if the various local organizations will take up the campaign and a large turnout is greatly desired. The discussions will be of such a nature that all employers will benefit by them.

In order to have the matter ready to present in some convincing form the local threshermen are asked to supply all the necessary data about accidents with threshers during the last two years, in this vicinity.

LAYMEN'S MEETING

Prominent Lutherans will Speak in Brua Chapel Thursday Night.

A public meeting will be held in Brua Chapel Thursday evening by the executive committee of the Lutheran Laymen's Movement. Several talks will be given by men who are prominent and successful in business affairs. At noon they will be the guests of Dr. and Mrs. Granville at luncheon. The evening session is announced for 7:30. The following compose the committee:

J. L. Clark, president, Ashland, Ohio; H. L. Hess, secretary, Ashland, Ohio; P. A. Elssesser, treasurer, York; E. J. Young, Wadsworth, Ohio; F. W. Albrecht, Akron, Ohio; William Decker, Montgomery; W. C. Stover, Philadelphia; Harvey C. Miller, Philadelphia; G. A. Klinefelter, Baltimore; E. G. Hoover, Harrisburg; W. L. Glatfelter, Spring Grove; Charles Steele, Northumberland; and J. E. Miller, Philadelphia.

LOWEST RECORD

Fewer Deaths from Scarlet Fever in October Than Ever Before.

The statement of deaths in Pennsylvania for October, 1915, issued by the Bureau of Vital Statistics of the State Department of Health, shows fewer deaths from scarlet fever in Pennsylvania during that month than in any October since 1906, prior to which time there were no statistics collected for the State. For the entire ten months of 1915 the death rate from scarlet fever has been lower than ever before. Diphtheria also has shown a new low record, 185 deaths, were recorded in October from this cause.

WON ANOTHER

Local Basket Ball Tossers Have Little Trouble with Visitors.

Another victory was added to Gettysburg's list Tuesday evening when the local basket ball quintet won from Davis and Elkins College 64-37. Mahaffie threw twenty baskets out of twenty two fouls. Whitwell made twenty nine of the visitors' points. Fouling was frequent on both sides.

MANY PERSONS TAKEN BY DEATH

Gettysburg Man Dies in Sykesville. Death at County Home. Child Dies from Effects of Teething. The Funerals.

JOHN T. HANRAHAN
John Thomas Hanrahan, of South Washington street, died at twelve o'clock Tuesday night at Sykesville, Md., from a complication of diseases, aged 41 years, 5 months and 15 days. He leaves his wife, formerly Miss Emma Warner, daughter of Mr. and Mrs. George Warner, of South Washington street; two sons, John and George, at home; three step children, Mrs. Ruth Baggott, of York street; Miss Gladys Warren and Herbert Warren, at home. He also leaves his mother, Mrs. Arula Hanrahan, and one brother, Raymond Hanrahan, of Alexandria, Virginia.

Funeral Sunday afternoon at 2:00 o'clock from the home of his mother in Alexandria.

MATHIAS GRIM

Mathias Grim, a well known farmer of Berwick township, near Abbottstown, died Sunday evening at 6 o'clock, after two weeks' sickness. He was 77 years, 2 months and 7 days old.

Besides his wife he leaves the following children: Mathias Grim, of Lancaster; Levi Grim, of near Rodgersville; Mrs. Abraham Lehigh, of Dallastown; Mrs. Clayton Lehigh, of Berwick township; Mrs. Charles Smith, of York; Mrs. Norman Moul, of Abbottstown. Three brothers, Peter Grim, of near Rodgersville; Daniel Grim, of Lancaster, and Samuel Grim, of Dayton, Ohio, also survive.

Funeral this morning at Mummer's meeting house, near East Berlin where concluding services were held. Interment in the adjoining cemetery. Rev. Charles Baker and Rev. Henry Miller officiating.

RHODA KEENEY

Rhoda, the infant daughter of Mr. and Mrs. James Keeny, living below Abbottstown, died suddenly Tuesday morning at 7:30 o'clock, death being caused by paralysis of the heart, due to teething. The child was 7 months and 20 days old.

Mrs. Keeny left the child in the kitchen while she hurried to the yard to feed the chickens, and returned a few moments later. Going toward her baby the mother was startled to see her head dropping. A closer investigation revealed that she was dead. Dr. H. T. Stambaugh was quickly summoned. He pronounced death to have been due to paralysis of the heart, believed to have been superinduced by teething.

Besides the parents, four sisters and one brother survive. The funeral will be held on Friday morning at 9:30.

MISS MARIA MCGUFFIN

Miss Maria McGuffin died at the County Home, Tuesday evening at 7:00 o'clock, aged 87 years. Miss McGuffin had been an inmate at the institution for the past 39 years.

Funeral services in the chapel at the County Home Thursday afternoon at 2:30 o'clock, conducted by Rev. F. E. Taylor. Interment in Evergreen Cemetery.

HANOVER FAIR OFFICERS

Stockholders of Agricultural Society Hold Annual Meeting.

The annual stockholders meeting of the Hanover Agricultural Society was held Monday, when the following officers and directors were elected for the ensuing year, president, Charles S. Shirk; vice president, C. N. Myers; secretary, S. A. Geisselman; treasurer, T. J. Little; directors, H. D. Sheppard, H. M. Stokes, Charles S. Shirk, William B. Alloway, R. L. Ehrhart, C. N. Myers, D. Gay Hollman, Ward C. Haffner, H. N. Girt, A. T. Haffner, and Louis B. Haffner. C. S. Shirk succeeds C. J. Delone as president, and a director of the association, with which he was actively connected for a number of years. The new director of the board is R. L. Ehrhart.

WANTED: a young man to learn the dry goods business at Gettysburg, must be over 16 years. A written application stating age, naming a few people as references as to character, etc. Box 56, Gettysburg P. O., advertisement

HAVE BASE BALL POSITIONS FILLED

Five Pitchers and Squad of Infielders Signed up for Gettysburg's Team in the Blue Ridge League.

Gettysburg will start its Blue Ridge base ball season this year with a better team than represented the town at any time last summer. Plank has signed up a number of players, with established reputations and known ability.

For catcher he has a man from one of the southern leagues who caught sixty three games last year and had a batting average of .278. His contract has not yet been signed but the fellow is as good as sure and that position will be well taken care of with Mahaffie or Bigler to catch in the event of the regular man being hurt.

Five pitchers will compose the staff. Plank will take his turn this year and Herril was held under the reserve clause. The other three are Myers, who made for himself a name in independent base ball in Virginia; Campbell, winner of seventeen out of twenty four games in the Oklahoma league last year; and Trego, the Dickinson College star. Campbell will be the tallest pitcher in the league, measuring six feet, one inch. And this is not all, for Plank has in reserve a surprise to be sprung a little later on, which will assure local fans of one of the best slab artists on the circuit.

Weinrock, who has played in New Jersey and Delaware base ball for several years and has been regarded as specially promising is secured for first base. Kertling, a southern league player, will fill second, and Bigler, the fastest man in the league last year, will fill third. Swartz and Boyne (a brother of Gus), and Oylar, are named for infield work at this time, with a new man possibly to come in, in case the others can be used otherwise. Gus Boyne is still owned by Frederick.

In the outfield will be Mahaffie and Bashore from last year's team and Stanhouser, of Paterson, New Jersey, formerly in the Oklahoma and Connecticut leagues.

Bigler, Mahaffie, and Bashore are the only ones of the squad whose college work will prevent their being on hand for the opening of the season. Competent men will be secured to handle their positions until they are available.

The local management has not been idle during the past few months and the Patriots will get away with a flying start, say the hopeful ones.

TURNPIKE HEARING

Public Service Commission Representative Takes Testimony.

Mr. Phillips, a representative of the Public Service Commission, viewed the road known as the Hanover & McSherrystown turnpike Tuesday morning. Testimony was taken afterward relative to the petition which was sent to the Public Service Commission some time ago by the Adams County Motor Club asking the Commission to force the Hanover & McSherrystown Turnpike Co. to repair its pike. George J. Benner Esq., of Gettysburg, represented the motor club, and C. J. Delone Esq., represented the pike board.

AFTERNOON FIRELET

Chimney Blaze Causes Trouble at Mummashburg Street House.

An overheated chimney was responsible for a fire at the home of George Stape, on Mummashburg street, about three o'clock this afternoon. The college chemical tank was hurried to the scene and the students held the fire in check until a bucket brigade could be formed. The town fire company responded but its services were not needed. Little damage was done except to the roof. The house was recently sold by Jesse Snyder to Rev. S. F. Snyder.

MANY FARMERS ARE MOTORISTS

Larger Proportion than in Any Other Single Occupation, it is Said. Increase of Fifty Per Cent now.

Pennsylvania farmers own over 14 per cent of the automobiles registered in the State during the past year. On the first of the year there were 22,608 automobiles in the hands of the farmers of the State, according to the estimates of the bureau of statistics of the Department of Agriculture. The report shows that 9.5 per cent of the farmers are car owners and this means that there is an automobile on one out of every ten farms. A year ago it was estimated that there were 15,000 automobiles in the hands of the farmers of the State, but the popularity of the motor car, both for business and pleasure, has been so marked among the tillers of the soil that the remarkable increase of 50 per cent has been made in one year's time.

In 1915 there were 159,984 automobiles registered in Pennsylvania and the farmers are shown to own 14.1 per cent of that total. Many of the registrations granted by the state were for cars owned by non-residents and the percentage of farmers owning cars is likely to be much higher if the total number of state owners could be ascertained. The rural residents undoubtedly led by a fair margin all other classes as purchasers of cars during the year.

In ten out of sixty seven counties the reports show that from 15 to 18 per cent of the farmers own cars. In thirty one counties 10 per cent or more of the farmers are shown as car owners. Lancaster county leads with over 18 per cent of the farmers, owning an estimated total of 1,842 cars. Chester county farmers own 1,013 cars and Bucks county farmers 953 cars. In many counties during the year gains of 100 per cent in the number of farmers owning automobiles were common, while in some counties the gains were from 150 to 200 per cent.

Ten per cent of all the farmers of Dauphin county own automobiles, 12 per cent of those of Cumberland, 13 per cent of those of Lebanon and 19 per cent of those of Perry. Dauphin county farmers own a total of 268 cars, Cumberland farmers 365, Lebanon farmers 328 and Perry farmers 216.

BENDERSVILLE

Bendersville—Missionary meeting will be held in the Lutheran church Sunday evening, January 23, at 7:30.

Miss Esther Eldon, of Carlisle, is spending several days at her home.

Mr. and Mrs. James Kuhn and daughter, Hazel, spent Sunday with J. C. Stover and family.

Mrs. Jacobs and daughter, Virginia, of Arendtsville, are visiting Mrs. Jacobs' parents, Mr. and Mrs. Charles Lerew.

Luther Scott, of Harrisburg, spent Sunday with his parents, Rev. Mr. and Mrs. Scott.

Mrs. Denton Taylor is ill at this writing.

Charles Stover and George Eppelman have gone to Harrisburg to work.

Miss Ella Peters has returned to her home in Gettysburg after spending some time with her parents, Mr. and Mrs. J. C. Peters.

Miss Grace Stover spent Sunday in Biglerville.

Mrs. Annie Bushman, of Carlisle, visited her mother, Mrs. Frye.

Mrs. John Boose and son, Leroy, of Dillsburg, are spending some time with H. L. Fair and family.

SIGNS IN PLACE

Must Observe Traffic Measure in Centre Square.

"Keep to the Right" signs were again placed in Centre Square today. Of the eight originally secured some months ago all but two were knocked down by automobiles and broken. A more or less general disregard of the traffic ordinance followed the disappearance of the signs and it was deemed best to put them in position again.

TABLES Aid Society of the U. B. church will hold a chicken supper at the O. of I. A. Hall, Tuesday evening, February 1st. Tickets, 25 cents.—advertisement

Maintaining Concrete Roads.
The methods of maintaining the concrete roads of Wayne county, Michigan are set forth in detail in the ninth annual report of the county road commissioners, which has recently been

published. For this work the authorities use a crew of seven men, provided with a team, tar kettle, seven wire bristle brooms, wheelbarrow, bucket and sprinkling cans. The ordinary cost of this outfit is as follows:

low: Foreman, \$5 per day; team and driver, \$5 per day; tar man, \$3 per day; two laborers at \$2.50 per day each and two laborers at \$7.25 per day each. All cracks or spalled joints were cleaned with wire brushes and the

filled with tar heated to about 225 degrees F. This is allowed to stand for a few minutes to prevent bubbling and is then covered with clean coarse paper and spread with a shovel, an exc-

The material used is a special mix of tarria, which has a melting point of about 35 degrees F. A hole

crack that does not extend into the road, but is over an inch in depth, cleaned and dried out, painted with hot tar and filled with stone of a suitable size, graded as nearly as possible to fill the voids. This is tapered

rolled in place, after which it is covered with hot tar, enough being used so that most of it will be taken up by the remaining voids. Coarse dry sand is then shoveled over the surface.

Lots of Excitement.
A Philadelphia woman who has a
trouble in filling her rooming house
once had an applicant who objected
the lack of interesting surroundings.
"Oh, plenty of excitement," said the

wideawake landlady: "from the fire window here you will have such a view of people missing the subway trains!"

WAR QUESTIONS FAR FROM EASY

Apparently Simple Test Puzzles New York Teachers.

CLASS AVERAGE ONLY .55.

Give the Full Title of the King of England—That Seems Easy, but Not One Person in a Hundred Could Do It Offhand—Here's Another: Which Countries Bound Serbia?

A war test was recently conducted by a group of New York pupils, and the questions asked were apparently easy and simple. But the result was astounding, for in a class of twenty-three, many of them teachers in the New York schools, the average was but .55 per cent.

The questions, with the correct answers were as follows:

- Q. Where is Gallipoli?
- A. Gallipoli is in Turkey. It is a peninsula forming the northern shore of the strait of Dardanelles.
- Q. What is the capital of Bulgaria?
- A. Sofia.
- Q. What countries bound Serbia?
- A. Austria-Hungary on the north, Rumania and Bulgaria on the east, Greece on the south and Austria-Hungary, Montenegro and Albania on the west.
- Q. In what country is Saloniki?
- A. Greece.
- Q. On what sea is Montenegro?
- A. Adriatic.
- Q. Who is in command of the French army?
- A. General Joffre.
- Q. Who is the prime minister of England?
- A. Herbert H. Asquith, K. C.
- Q. Who is Von Bethmann-Hollweg?
- A. Chancellor of the German empire.
- Q. Who is Poincaré?
- A. President of France.
- Q. Who is Venizelos?
- A. A former premier of Greece.
- Q. Who is Briand?
- A. Premier of France.
- Q. Who is Von Hindenburg?
- A. Germany's most popular war hero and leader of the kaiser's forces on the northern front in Russia.
- Q. Who is General French?
- A. A general until recently in command of the British forces in France.
- Q. Who is Sir Edward Grey?
- A. British foreign secretary.
- Q. Who is Viviani?
- A. Former premier of France and minister of justice in the present cabinet.
- Q. Name with proper title the ruler of Germany.
- A. William II, German emperor and king of Prussia.
- Q. Name with proper title the ruler of Greece.
- A. Constantine I, king of the Hellenes.
- Q. Name with proper title the ruler of England.
- A. George V, "by the grace of God king of the United Kingdom of Great Britain and Ireland and of the British dominions beyond the seas, king, defender of the faith, emperor of India."
- Q. Name with proper title the ruler of Italy.
- A. Victor Emmanuel III, king of Italy.
- Q. Name with proper title the ruler of Belgium.
- A. Czar Ferdinand.
- Q. Name with proper title the ruler of Russia.
- A. Nicholas II, emperor of Russia.

HUERTA WAS A POOR INDIAN.

With No Advantages He Became the Strong Man of Mexico.

General Victoriano Huerta, who died in El Paso the other day, was eulogized by his friends, who declared that he was the Napoleon of Mexico. His enemies have denounced him as the most unscrupulous dictator Latin America ever knew, as the murderer of President Madero, a traitor to his country, as a man whose policy was disorganizing his nation's treasury.

But this has been succeeded by enemies and friends alike that he was one of the strongest men that Mexico has seen in recent years.

His rise was all the more startling in view of his early upbringing. Victoriano Huerta was a full-blooded Indian. He was born in Coahuila, state of La Huasteca, on Dec. 20, 1874. Coahuila was an Indian village, and Huerta's parents were people of the lower class. The boy, dressed in a clean cotton shirt and without shoes or hat, was one of thousands of Indian boys in Mexico, playing in the dust and living in hovelous huts.

However, the village priest taught him to read and write, and it was this fact which gave Huerta an advantage over the army.

When he was eighteen years of age, Miguel Alemán, governor of Coahuila, called him to his office. He offered him the position of clerk, and Huerta got the job. Through close relations with the governor, he told the governor that it was his ambition to join the army. He then took him to Mexico City and secured a position as a clerk in the office of the governor of the Coahuila military academy. In 1895 Huerta was graduated.

For the next three years he led the life of an army officer and after that his history is well known.

And More Events.

President Madero, after his fall, was succeeded by General Huerta, who was a man of Indian blood. He was the first Indian to become president of Mexico.

MAPS PLAY HUGE PART IN BIG WAR

Germans Began Charting Surface a Century Ago.

ALL NATIONS ADOPT SYSTEM

Every Object in Territory Covered by the Maps Shown by Certain Signs. Form Basis For All Movements of Troops and Must Be Absolutely Correct—Roads and Footpaths Shown.

In modern warfare and especially in the present world conflict accurate maps are the greatest auxiliary of the armies, and they play a far more important part in the operations than the general public knows. Without them success is impossible.

These maps are worked out with infinite care by special departments of the general staffs of the armies of the different countries. Only officers possessing special training and knowledge are assigned to the work.

The first military topographical bureau was established by the general staff of the Bavarian army nearly a century ago under the direction of General von Naus, who also became famous as a mathematician and darning mountain climber. Other countries, however, were slow to follow the example of Bavaria. In Prussia an exact topographical survey of the country was not undertaken by the general staff until 1852. About the same time the leaders of the Austro-Hungarian army became convinced that the maps then in existence were not sufficient for war.

The Austrian topographical bureau was organized in 1858 under the direction of Captain Julius von Fayer, who later became famous as an arctic explorer. France waited still longer and as a result was badly handicapped in the war of 1870-71 by the lack of accurate maps. In this war it is said the French officers were supplied with maps of Germany, but none of France.

All Nations Use System.

During the last forty years all countries are using the same system in the production of the general staff maps. The method seems complicated, but is simple enough. First the country is divided into triangles, the corners of which are marked by church steeples, high poles, trees and other landmarks. Every one of these triangles then is surveyed separately and again divided up into smaller triangles. The corners of these subdivisions are marked by small square granite blocks, which are sunk into the ground so that only their tops are visible.

After the subdivisions have been laid out and marked the officers entrusted with the work draw large maps of every one of them. These maps show the minutest details of the landscape and are then joined and reproduced on a smaller scale by expert draftsmen. In this manner an exact topographical picture of the whole country is obtained.

The general staff maps speak a language of their own. This language is very simple, but must, of course, be understood. Every object in the territory covered by the maps is shown by certain signs. Blue woods are marked by little sharp cones, other woods and trees by groups of small circles and dots, elevations by curves which show the heights of the hills, roads by double and foot paths by single lines.

There are also certain signs for church steeples, mills, ponds, brooks and isolated farmhouses. Nothing is missing, and a man looking at one of these maps and understanding it has the impression of flying over the territory and looking down upon it from a height.

All maps of the general staff have to be absolutely correct. They not only form the basis for movements of troops, but also have to be used by the artillery in ascertaining the distances and finding the range of the positions of the enemy. In this respect the German maps have become world famous as they are drawn with proverbial German thoroughness.

WHEN CLIFF DWELLERS LIVED

University of Arizona Starts Experiments to Determine Time.

Experiments are being conducted at the University of Arizona, at Tucson, to determine, in an effort to determine when the Arizona cliff dwellers lived.

The theory of Dr. A. E. Douglas, professor of astronomy at the university, that there is an exact relation between the rainfall and other climatic conditions in various years with the size of the rings shown in the cross section of the trunk of a tree is being used in connection with the experiments. Trunks of trees used by the cliff dwellers in constructing their dwellings, many of which are still intact, will be compared with the trunk of the largest tree that can be found in Arizona.

If the rings are similar in their character, the time at which the cliff dwellers inhabited the southwest will be reckoned from the known age of the tree.

5,865 Persons Reported Missing.

Records of the New York police department show that 5,865 persons outside the city and 1,055 living inside the city were reported missing last year. Nearly all of them were found by the police or returned home of their own accord.

TELLS MINERS TO KEEP JOBS

White Advises Men to Stay at
Work Pending Negotiations.

RAPS AT PREPAREDNESS

Head of Union Declares Workingmen
Are Opposed to Whole Scheme and
Praises Wilson for Keeping Country
at Peace.

Indianapolis, Ind., Jan. 19.—About thirteen hundred delegates faced the president, John P. White, when he opened the twenty-fifth convention of the United Mine Workers of America. Before the convention adjourns it will have outlined a policy that will affect probably a half million coal miners in the United States and Canada. Major agreements expire this year in all the hard and soft coal districts of Pennsylvania, Ohio, Indiana, Illinois, West Virginia, Kentucky, Michigan, Iowa, Kansas, Oklahoma, Missouri, Texas, Montana, Wyoming and Washington. In these states new demands will be made, and if the powers that now control the miners' organization have their way, coal mining will continue without interruption so long as there is a possible chance of coming to an agreement.

Mr. White declared in his biennial report that he was "fully convinced that the men of labor are unalterably opposed to the whole scheme of preparedness." Mr. White commended President Wilson for keeping the country at peace, and said too much praise "can not be given to the president for his great efforts in that direction."

Taking up organization affairs, Mr. White said:

"I most earnestly urge that our scale committee carefully canvass the situation when forming our demands for the consideration of this convention." He said, "Industrial conditions are greatly improved now, and from various authoritative sources we are advised that the country is entering upon an unprecedented era of prosperity. We should demand such improvements in our wage scale as conditions will warrant."

Mr. White said he thought the policy of keeping the miners at work pending negotiations is essential to the well-being of the organization and its membership and the welfare of the public. "There is no longer any need of retarding idle during discussions and destroying the market of the organized territory by permitting a few who speculate in stock coal to take money out of the misfortunes of the people." Therefore he recommended that we affirm our policy to work pending negotiations.

Mr. White reviewed the history of the Colorado strike, and reiterated his opposition to the Rockefeller plan of dealing with labor in the mining districts of Colorado.

Mr. White dealt briefly with the anthracite situation. He referred to the efforts of the workers to increase the membership in the hard coal field and added:

"I compliment them on their splendid showing and I believe if they are given the proper encouragement and support they will realize the ideal for which they have been struggling."

NERVY FEMALE THIEF

Rebs Wife of Police Officer and
Threatens to Kill Her.

Philadelphia, Jan. 19.—A woman dressed in black who posed as a friend of Lieutenant of Police George Smiley, of the Germantown station, gained admittance to the police officer's home 1522 North Sixty-second street, and after stealing \$18 from a sideboard drawer, she threatened to shoot Mrs. Smiley and her two-year-old son, Warren, if she ever told the police of the affair.

Not content with this the robber dragged a telephone from Mrs. Smiley's hand and knocked her to the floor. Then she drew a pearl-handled revolver from her handbag and standing astride of the prostrate woman threatened to shoot her if she made any outcry. The woman escaped and has not been caught.

Shed Industrial War Ahead.

Cincinnati, Jan. 19.—Business men of the United States were urged to prepare for a worldwide industrial war which will follow the end of the military struggle in Europe by James A. Hober, of Washington, who spoke at the fourteenth annual convention of the Hardwood Manufacturers' association.

Operate On Boy to Aid Mind.

Wahonoy City, Pa., Jan. 19.—With the hope of restoring his mental faculties, Anthony Yankus was operated upon at the State hospital, at Fountain Springs. Several years ago the boy fell from a high chair, striking his head on the floor. Since that time he has been mentally feeble.

Sisters Burn to Death.

Pittsburgh, Pa., Jan. 19.—Miss Mabel Warden, twenty-three years old, and her sister, Fiorella Warden, a year younger, were burned to death, and their mother, Mrs. Myra Warden, was seriously injured when their home here was destroyed by fire. The property loss was \$1500.

Imitation Ivory.

Imitation ivory is obtained from the bark of a kind of palm which grows in South America.

SPY ESCAPES IN BROOKLYN

Former Member of English Parliament
Gets Away From U. S. Deputy.

New York, Jan. 19.—Ignatius T. Frelich Lincoln, a former member of the British parliament and a self-confessed German spy, who was being held pending extradition to England, escaped from a United States deputy marshal on Saturday. It was learned and has not been seen since.

The United States marshal notified the secret service and a nation-wide search has been ordered. It is believed Lincoln boarded an on-gold steamship. He had been held in Raymond street jail, Brooklyn, since August.

The prisoner was writing a book dealing with international espionage, and he was in the habit of going to the Brooklyn federal building to work on this two or three times a week, accompanied by a deputy marshal.

With Frank Johnson, a deputy, Lincoln visited the federal building Saturday. They stopped in a restaurant after leaving the building. Lincoln went to the lavatory. When the prisoner did not reappear within ten minutes, Johnson began a search.

OFFER PROHIBITION BILL IN MARYLAND

Anti-Saloon League Act Provides
State-Wide Vote.

Annapolis, Md., Jan. 19.—The state-wide prohibition bill of the Anti-Saloon League was introduced in the senate and will be introduced in the house later.

The bill provides for a vote through out the entire state on the liquor question. It is not in the shape of an amendment to the constitution, but is a simple measure with a referendum. Superintendent of the Anti-Saloon League, Dr. Hare, explained that the bill provides that in the event of a vote those sections of the state now dry shall remain dry.

He said, however, that if the people from the "wet" sections object, the Anti-Saloon League will be very glad to provide in the bill that under the vote to be had if the bill passes, the whole state shall be "wet" or "dry," as the majority of the voters declare.

This plan, he feels sure, would result in a solid vote in favor of the bill on the Eastern Shore and other "dry" counties.

Tragedies in Widow's Death.

Reading, Jan. 19.—Stricken with paralysis on the street and picked up by strangers, placed in an ambulance, which was struck by another auto en route to a hospital, her death in the hospital and removal of her body to a morgue, unidentified, were the tragic happenings in the case of Mrs. Catherine Folk, aged widow of Ephraim Folk, of this city, who was found unconscious in a section of the city remote from home.

Want \$400,000 for Cardinals.

St. Louis, Mo., Jan. 19.—Scamper Britton, president of the St. Louis Cardinals, has quoted a price on the franchise and on the playing field to Henry P. Sinclair, of Tulsa. The price was quoted at the request of Sinclair. It is said the price was approximately that which was quoted to Paul Saff for the St. Louis National's before the latter bought the St. Louis American.—\$400,000.

Let Mrs. Pankhurst In.

Washington, Jan. 19.—Miss Emmeline Pankhurst, the British suffragette leader, detained by New York immigration authorities, was ordered admitted to the United States unconditionally.

SCIENCE—INVENTION.

New Way to Make Pure Iron.

An entirely new method of producing pure iron, which, it is believed, will save the electrical industries of the country over \$15,000,000 annually, has been discovered by Dr. Trygve Yenson, an assistant in the engineering experiment station of the University of Illinois.

The method used by Dr. Yenson consists of melting electrolytically refined iron in a vacuum, reducing the impurities thus far below any point which had been reached by previous investigators. The magnetic property of this vacuum fused iron has proved to be as remarkable as its purity. Its maximum permeability, a measure of ease with which it can be magnetized, was found to be about 20,000, which is two or three times higher than for the best magnetic iron or iron alloy previously produced.

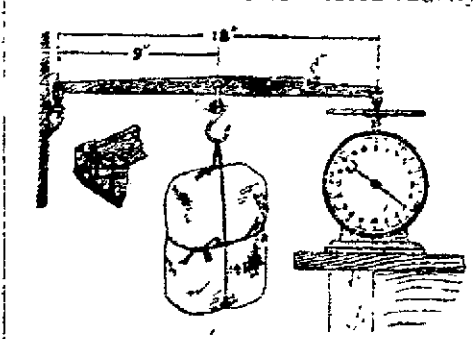

A practical result of this investigation is that if it should turn out to be commercially profitable the amount of material needed for electrical machinery such as transformers could be cut in two, and the losses which occur continuously as long as the machine is in operation would be greatly reduced.

Geological Survey Work.

The thirty-sixth annual report of the director of the United States geological survey, just made public, emphasizes not only the widespread activities of this scientific and economic organization, but their great diversity. The survey investigations cover every branch of the developed and latent mineral resources of a country whose mineral resources are the greatest in the world. The work of the survey is conducted under three scientific branches and includes three corresponding kinds of activity. Under the geological branch investigations are made concerning the mineral resources of the entire United States and Alaska, ranging from truly exploratory surveys of regions practically unknown to white men to the most detailed geological examination of mining camps. Last year 76,000 square miles were thus geologically examined.

Doubles Capacity of Scales.

The ordinary variety of spring scales can be made to weigh double the amount given on the dial by the simple beam arrangement shown in the illustration, says Popular Mechanics. Suitable dimensions are given, although these may be varied to suit the requirements. The only thing to remember is that the hook must be located exactly

CAPACITY OF SPRING SCALES DOUBLED.

halfway along the beam measuring between the two knife edged pieces of wood fixed at the ends. The beam should be made of light but strong wood one-quarter inch thick and the end pieces one inch long. In use the beam should be approximately level, with one end placed on the center of the scale platform and the other end set on a support, which could be a piece of wood nailed to the wall or any other support. The object hung on the hook will show only half its weight on the dial. Thus if the pointer indicates fifteen pounds the object weighs thirty pounds.

Drive on the Throttle.

Slow down when possible by means of the throttle and not by means of the brakes. If you keep your eyes open and do not rush wildly along the roads you will hardly ever have to touch your brakes, because it is the opening and closing of the throttle which regulates your speed. Use of the brakes means wear and tear of mechanism and tires. Use of the throttle means gentle action. Automobile Dealer and Repairer.

The Fan Belt.

If you find yourself with your fan belt broken and have no spare one there is no harm in driving without the belt if the weather is cool and you drive slowly, so that the water does not boil and if, further, you stop if it does boil and give it time to cool. In cold weather you can drive without the fan altogether, says Automobile Dealer. Indeed, when it is freezing, you often get more power and better running by doing so.

Aluminum Foil.

Aluminum foil, formerly imported, is now produced in New Jersey. It partly replaces tin foil for wrapping chocolate, tobacco and tea.

House For Rent

Two House on York Street, Gettysburg, with all conveniences.

Apply to

Mrs. Mary E. Miller
267 Baltimore Street.

FINDS NEW REMEDY FOR ECZEMA

Antiseptic Ucanol is Credited with Great Success.

The many sufferers from eczema in this vicinity will welcome the news that a new antiseptic has been discovered to relieve the itching and soreness almost as soon as it is applied, and which already has won for itself a remarkable record for its healing and curative properties in some of the worst and most chronic cases.

Antiseptic Ucanol aims to kill the germs when applied to the diseased skin—to grow new, healthy flesh that is free from soreness and eruption. A liberal supply of antiseptic Ucanol can be had for not more than 50 cents at any good druggists, while The People's Drug Store sells it with a guarantee to refund the money if Ucanol does not do all that is claimed. Do not suffer longer with eczema or other skin troubles but use this scientific combination of healing, antiseptic agents combined in antiseptic Ucanol and get quick relief.

For a free trial sample of Ucanol write to Tryol Products Co., Inc., Dept. J-1, Buffalo, N. Y.

Relieves The Worst Cases Of Catarrh

Think "Hyomei the Most Wonderful Treatment For Catarrh Ever Discovered."

Do not try to cure catarrh by using sprays or lotions; it cannot be cured in that manner. The only way in which this too common disease can be fully relieved is through a direct application to the affected parts that will kill the bacilli of catarrh and prevent their growth.

Breathing the air of Hyomei is the only known method of treatment that can really accomplish this. It is the simplest, most pleasant and probably the most reliable treatment for catarrh that has ever been discovered.

The complete Hyomei outfit is inexpensive and consists of an inhaler, dropper and sufficient Hyomei to last several weeks. This will effect instant relief in ordinary cases, but for chronic and deep-seated cases of catarrh, longer use may be necessary, and then an extra bottle of Hyomei can be obtained for a trifling sum. It is not alone the best (it might be called the only) method of treating catarrh, but it is also the most economical.

The People's Drug Store have so much confidence in the power of Hyomei to relieve catarrh, that they will for a limited time, sell this medicine under their personal guarantee to refund the money if the purchaser can say that it did not benefit.

Gray Hair Becomes Dark, Thick, Glossy

Try Grandmother's Old Favorite Recipe of Sage Tea and Sulphur.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray; also cures dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome.

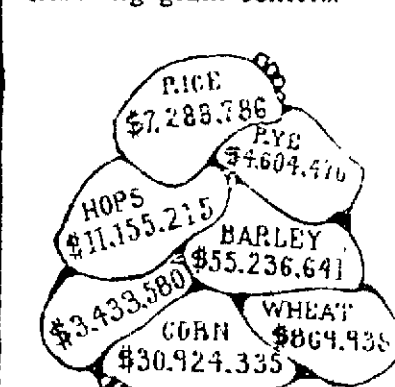

Nowadays we simply ask at any drug store for "Wyeth's Sage and Sulphur Compound." You will get a large bottle for about 50 cents. Everybody uses this old, famous recipe, because no one can possibly tell that you have used your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, thick and glossy and you look years younger.

Facts Versus Fallacies

FACT is a real state of things. FALLACY is an apparently genuine but really illogical statement or argument.

IT IS instructive to learn from the U. S. Department of Agriculture that never before have brewers, malsters, distillers and wine-makers made so large a contribution to the agricultural prosperity of the nation as during the fiscal year 1913.

WHAT the liquor industry means to the Farmer can be appreciated, when it is shown that in 1913 grain and other farm products to the enormous value of \$113,513,971 were used in the manufacture of liquors; and this was the actual amount received by grain growers, not counting the largely-increased value and profits reported in the markets of Chicago and other distributing grain centers.

THIS \$113,513,971 worth of farm products, used in the production of distilled spirits and fermented liquors, consisted of barley to the value of \$55,236,641, corn \$30,924,335, wheat \$69,938, rice \$7,288,786, hops \$11,155,215, rye \$4,604,476, and other products of the farm to the value of \$3,433,580.

ADDITIONAL information in this connection to enlighten citizens who have been misled by FALLACIES from a realization of the cost and consequence of a Prohibition law, are findings of FACTS that the average barrel of beer yields the farmer more than \$1 of the selling price, or to be exact, \$1.23—and that farm products used by the brewers and distillers in the last fiscal year provided a total payment for farm labor of \$13,485,480, a sum sufficient for the employment of 73,919 persons for six months at the average wage of \$30 a month each.

AND from these same figures we find that the manufacturers of distilled spirits and fermented liquors in Pennsylvania alone used farm products in 1913 to the value of \$12,674,736.

THE American farmer is not wanting in resourcefulness, but it is not a FACT that it would cause him grave embarrassment and heavy financial loss for products that annually return him \$113,513,971 cash for his labor if the FALLACY of Prohibition were to become a law?

Pennsylvania State Brewers' Association

The KITCHEN CUPBOARD

Sunday Night Suppers.

ROAST SQUAB.—Clean squab neatly and truss as if it were a turkey, using wooden skewers. Pass a piece of nice fat pork over the breast of each pigeon and tuck behind. Put a small piece of butter inside of each pigeon and stuff with truffles, but that is not necessary. Put the pigeons in roasting pan and add a tablespoonful of butter and about two tablespoonfuls of water. Baste frequently and be careful not to scorch, letting the birds roast from fifteen to twenty minutes. Have a slice of toast for each pigeon. Butter well, remove fat pork and place on toast. Pour over each a little of the gravy in roasting pan, allowing it to soak into bread. Serve hot with jelly or cranberry sauce.

Lamb Loaf.—Trim and cut in small pieces a forequarter of lamb, place in kettle, cover with cold water and cook until meat will leave the bones easily; remove meat from liquor and bone, chop fine, season with pepper and salt, moisten it with three-quarters cupful of the liquor, put in bread rins and leave in a cool place.

Creamed Shrimps.—Melt two tablespoonfuls of butter, add the same quantity of flour and stir until well blended, then pour on gradually, stirring all the time, three-quarters of a cupful of rich milk. Bring to the boiling point and add three-quarters of a cupful of stewed and strained tomatoes mixed with a pinch of soda, two cupfuls of finely cut cheese, two eggs slightly beaten, one pint of shrimps cut in pieces and salt, mustard and cayenne to taste. Serve on pieces of toasted bread or crackers.

Creamed Sweetbreads.—Creamed sweetbreads calls for one pair of blanched sweetbreads, a half pint of cream, one tablespoonful of butter, one tablespoonful of flour, salt and pepper and two tablespoonfuls of chopped mushrooms. Cut the sweetbreads into small pieces. Melt the butter in a porcelain lined pan, stir in the flour, and when this is thoroughly mixed add the cream. Now add the sweetbreads and the mushrooms and cook for five minutes. If you like you may add a tablespoonful of sherry wine just before serving.

Anita Thompson.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

The Winter Tailor Made.

Delightfully smart is this tailored costume made upon Russian blouse lines. It is trimmed with fur. Of particular interest is the skirt, which is the subject of today's dress-making lesson.

The entire costume requires 4½ yards 56-inch material, but the skirt alone calls for only 2½ yards. It is a three-piece model with high waist-line finished with a plain belt trimmed with buttons.

By studying the construction guide and following directions carefully the home dressmaker can make up the skirt in a few hours. The first step is to join the gores as notched, leaving left side seam free above large "O".

CONSTRUCTION GUIDE 6429

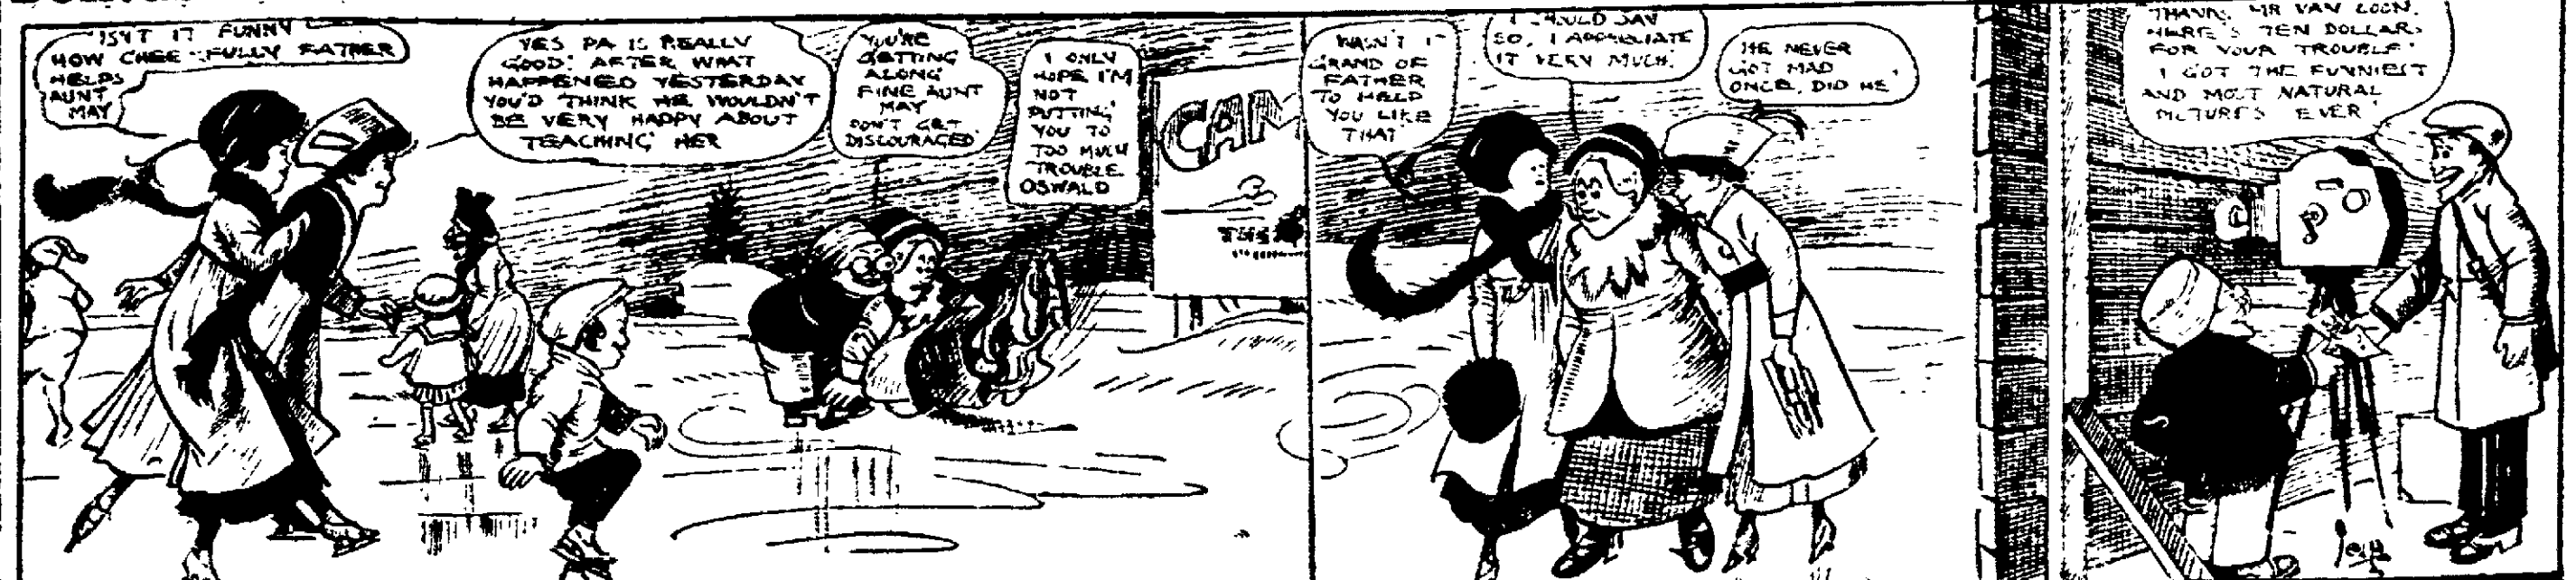

perforation in front gore for placket. Pleat, creasing on lines of not perforations; bring folded edges of corresponding lines of small "O" perforations; stitch as illustrated or trim with narrow band, then press carefully so that the pleats will have good lines. After this the back seam may be closed.

Next, adjust 2-inch belt to position underneath upper edge of skirt for a stay and stitch upper edges together.

To make the belt, turn the hem at the front edge at notches, the large "O" perforation indicating the center front. Adjust to position and trim with bands of heavier or lighter.

It appears that Father had a reason
